

# LEANDRO SABUS

## Software Developer

*I am a Fullstack developer and I work mainly with technologies such as Javascript, Typescript, React and NodeJS. I am constantly learning and updating my knowledge. I have great communication skills due to my background in teaching, which leads me to adapt easily to teams and work environments.*

### Angular de cero a experto

DevTalles

2023 | 2024

### React de cero a experto

DevTalles

2022 - 2023

### The web developer bootcamp

Colt Steele

2021 - 2022

## WORK EXPERIENCE

### Fullstack Developer

ItecniS | March 2024 - Present

- Maintenance and creation of user interfaces using React
- Creating back-end services using NodeJS
- Creating CRM services with Odoo/Python
- Development of chatbots with NodeJS
- Development of landing pages for international clients.

### Front-end Developer

Id for Ideas | ene 2023 - December 2023

- Actively participate in the design of user interfaces together with the UX/UI team using Figma.
- Implement customization of application styles with TailwindCSS.
- Design, develop and maintain various interfaces (search engines, topic grids and filters by categories and dates).
- Work closely with other team members to resolve technical issues and optimize development efficiency.
- Define, design and deliver new reusable functionalities (in order to optimize team time when implementing similar functionalities in different components).
- Manage the database using MySQL, creating tables and versions of different application data.
- Use React for essential functions, such as fetching data using Fetch and Hooks.

## ACADEMIC EDUCATION

### Web Development Technician

UTN Online

2022 - Present

### National physical education teacher

Instituto Sup. Docente n° 20

2015 - 2019

## LANGUAGES

- English | B2
- Spanish | native

## PERSONAL PROJECTS

### Front-end Developer

Freshbite | Dec 2024 - Present

- I participate in the creation of web application for the gastronomic industry.
- Creation of user interfaces using React, Typescript, SASS.
- Sketch design and prototyping in Figma.
- Implementation of important functionalities for the application such as user registration, modal, interpretation of data from the API Rest.

### Mercado Libre Clone

I cloned the interface of a free market product in order to make exactly the same design and adjust it to different devices.
